

SAID WALI KHAN

Software Engineer · AI / Machine Learning Engineer

✉ swalikhan885@gmail.com ☎ 0319 1902794 ♀ Islamabad, Pakistan
[linkedin.com/in/swalikhan](#) [github.com/Said192](#)

EXPERIENCE

Software Engineering Intern Eziline

Jun 2025 – Sep 2025

- Developed and tested software modules within a collaborative engineering workflow.
- Built and evaluated Machine Learning and Deep Learning models using Python.
- Supported AI/ML project tasks including data preparation, model training, and testing.

PROJECTS

JobPilot — AI Job Search Agent [github.com/Said192/jobpilot](#)

- Built a full-stack agentic AI application that parses resumes, fetches live listings from legal job APIs, and scores every job against the resume with embedding-based semantic matching and skill-gap analysis.
- Implemented a LangGraph agent layer (8 nodes: search, matching, resume writing, cover letters, company research, interview coaching) plus a RAG pipeline over user documents using ChromaDB.
- Delivered tailored resumes and cover letters (DOCX + PDF), JWT-authenticated FastAPI backend, Streamlit UI, kanban application tracker, Docker deployment, and a pytest test suite.

XJMU AI Consultant [github.com/Said192/xjmu-ai-consultant](#)

- Developed an AI-powered consultation assistant that answers user queries conversationally using large language models.
- Designed prompt and retrieval workflows to ground responses in domain knowledge for accurate, context-aware guidance.

AI Species Explorer [github.com/Said192/ai-species-explorer](#)

- Built an AI application for exploring and identifying species, applying computer vision and machine learning to classify images and surface species information.

Green Vision — Final Year Project

- Built an AI-driven environmental and security monitoring system designed for smart parks.
- Applied machine learning and computer vision techniques to detect and track environmental and safety conditions.

AI Research & Model Development

- Performed data cleaning and preprocessing for ML/DL workflows; trained and tested models and contributed to generative AI experiments.

EDUCATION

Bachelor of Science in Software Engineering University of Malakand

2022 – 2026 (Expected)

Relevant coursework: Artificial Intelligence, Machine Learning, Deep Learning, Data Analysis, Software Development, Database Systems.

LANGUAGES

Pashto Native ●●●●●
Urdu Fluent ●●●●●
English Intermediate ●●●●●

SUMMARY

Motivated and detail-oriented Software Engineer with hands-on expertise in Machine Learning, Deep Learning, Generative AI, Computer Vision, and Data Analysis. Skilled in developing intelligent systems, building agentic AI and RAG applications, and delivering AI-driven products that solve real-world problems using modern technologies and frameworks.

SKILLS

Machine Learning

Deep Learning

Generative AI

Computer Vision

Natural Language Processing

AI Agents (LangGraph)

RAG

AI Model Implementation

Data Analysis

Exploratory Data Analysis

API Integration

Python

SQL

TensorFlow

Keras

Scikit-learn

Pandas

NumPy

FastAPI

Streamlit

SQLAlchemy

ChromaDB

Docker

Git

Matplotlib

Seaborn

RELEVANT COURSEWORK

Artificial Intelligence

Data Analysis

Software Development

Database Systems

STRENGTHS

- Building AI-driven applications for real-world problems.
- End-to-end development: from data and models to APIs and UIs.
- Exploratory data analysis and model development.
- Detail-oriented, collaborative problem solver.
